Chapter 1: Corporate Policies

This chapter outlines AlphaTech Solutions' foundational policies governing all commercial interactions, customer relationships, and data handling obligations. All employees, contractors, and channel partners are required to adhere to the policies described herein.

1.1 Refund Policy

AlphaTech Solutions maintains a comprehensive, tiered refund framework designed to balance customer satisfaction with financial sustainability. The following rules apply uniformly across all product categories unless an explicit exception is stated in a customer's Master Service Agreement (MSA).

1.1.1 Standard Consumer Hardware Refunds

Customers who purchase AlphaTech hardware through authorized retail channels or the official AlphaTech Online Store are entitled to a full refund within thirty (30) calendar days of the invoice date, provided the device is returned in its original packaging with all accessories. Devices exhibiting physical damage, liquid exposure, or unauthorized modifications are ineligible for full refunds and will be subject to a restocking and assessment fee of up to 25% of the original purchase price.

Return Window	Condition	Refund %	Processing Time
0–30 days	Unopened / Sealed	100%	3–5 business days
0–30 days	Opened, Like New	100%	5–7 business days
31–60 days	Minor Cosmetic Wear	75%	7–10 business days
31–60 days	Functional Defect	90%	5–7 business days
61–90 days	Warranty Claim Only	Repair / Replace	10–15 business days

1.1.2 Enterprise & B2B Refund Terms

Corporate accounts operating under a signed MSA are subject to custom refund terms negotiated at the time of contract execution. In the absence of a bespoke clause, the default enterprise refund window is forty-five (45) days with a mandatory Return Merchandise Authorization (RMA) number issued prior to shipment. Refunds for SaaS subscriptions are prorated based on the remaining unused subscription days at the time of cancellation, rounded down to the nearest full day.

1.1.3 Non-Refundable Items

- Activated software license keys (digital delivery)
- Custom-configured hardware orders with company branding or proprietary firmware
- Extended warranty and service plan add-ons after a 14-day cooling-off period
- Consumable accessories (batteries, stylus tips, cleaning kits) once opened

© 2025 AlphaTech Solutions Inc. All rights reserved.

1.2 Privacy Policy

AlphaTech Solutions is committed to protecting the personal data of all individuals who interact with our products, services, and digital platforms. Our privacy practices are designed to comply with the General Data Protection Regulation (GDPR), the California Consumer Privacy Act (CCPA), and applicable data protection laws in all jurisdictions where we operate, including India's Digital Personal Data Protection Act (DPDPA) 2023.

1.2.1 Data Collection & Purpose

AlphaTech collects personal data exclusively for defined, legitimate business purposes. The categories of data collected include, but are not limited to:

- Identification data: Full name, government-issued ID numbers (where legally required), email address, phone number
- Transactional data: Purchase history, invoice records, payment method metadata (last four digits only; full card numbers are never stored)
- Device telemetry: Diagnostic crash reports, firmware version, battery health metrics — collected with explicit user consent via the AlphaTech Device Companion app
- Behavioural data: Website interaction patterns, support ticket history, and product feature usage (anonymized and aggregated)

1.2.2 Data Retention Schedule

Data Category	Retention Period	Disposal Method
Customer Account Records	7 years post-account closure	Secure cryptographic erasure
Transaction Logs	5 years (tax compliance)	AES-256 encrypted archive
Support Tickets	3 years	Database purge + audit log
Device Telemetry	18 months rolling	Automated pipeline deletion
Marketing Preferences	Until withdrawal of consent	CRM hard-delete

1.2.3 Individual Rights & Data Subject Requests

Individuals have the right to request access to, correction of, deletion of, or restriction on the processing of their personal data. All data subject requests must be submitted through the AlphaTech Privacy Portal at privacy.alphatechsolutions.com and will be processed within thirty (30) days. Identity verification is required before any data is disclosed or deleted.

1.3 Terms of Service

The following Terms of Service (ToS) govern all use of AlphaTech Solutions products, platforms, and services. By purchasing, activating, or using any AlphaTech product, users acknowledge and agree to these terms. AlphaTech reserves the right to update these terms with thirty (30) days' notice via email or in-product notification.

1.3.1 Acceptable Use Policy (AUP)

© 2025 AlphaTech Solutions Inc. All rights reserved.

Users may not use AlphaTech products or services to engage in any activity that:

1. Violates any applicable local, national, or international law or regulation
2. Attempts to gain unauthorized access to AlphaTech systems or third-party infrastructure
3. Distributes malicious code, spyware, ransomware, or any form of malware
4. Engages in unauthorized bulk data harvesting, scraping, or API abuse beyond documented rate limits
5. Infringes upon intellectual property rights, including reverse-engineering proprietary firmware

1.3.2 Limitation of Liability

To the maximum extent permitted by applicable law, AlphaTech Solutions shall not be liable for any indirect, incidental, special, consequential, or punitive damages arising out of or related to the use or inability to use AlphaTech products, even if AlphaTech has been advised of the possibility of such damages. AlphaTech's total aggregate liability shall not exceed the total amount paid by the customer for the relevant product or service in the twelve (12) months preceding the claim.

1.3.3 Governing Law & Dispute Resolution

These Terms are governed by the laws of the State of California, United States, without regard to conflict of law principles. Any disputes arising under these Terms shall first be subject to mandatory mediation before the American Arbitration Association (AAA). If mediation fails, disputes shall be resolved by binding arbitration in Santa Clara County, California. Class action suits are expressly waived to the fullest extent permitted by law.

© 2025 AlphaTech Solutions Inc. All rights reserved.

Chapter 2: Hardware Troubleshooting

This chapter provides systematic diagnostic procedures for AlphaTech hardware. All troubleshooting steps must be followed in the sequence presented. Field technicians should log every action taken in the AlphaTech Service Management System (SMS) using their assigned technician ID before proceeding to the next escalation tier.

2.1 Laptop Product Specifications — All Models

AlphaTech Solutions currently offers five flagship laptop models in the ProLine series, each targeting a distinct customer segment. The specifications below reflect factory defaults; enterprise deployments may have customized firmware.

Specification	ProLine 13 Air	ProLine 15 Pro	ProLine 15 Ultra	ProLine 17 Max	ProLine X1 Studio
CPU	Intel Core i5-1340P	Intel Core i7-1370P	Intel Core i9-1390H	AMD Ryzen 9 7945HX	Intel Core Ultra 9 185H
RAM (Default)	16 GB LPDDR5	16 GB DDR5	32 GB DDR5	32 GB DDR5	64 GB DDR5X
RAM (Max)	32 GB	64 GB	64 GB	128 GB	128 GB
Storage	512 GB NVMe SSD	1 TB NVMe SSD	1 TB NVMe SSD	2 TB NVMe SSD	2 TB NVMe SSD
Display	13.3" 2560×1600 IPS	15.6" 2560×1440 IPS	15.6" 3840×2400 OLED	17.3" 3840×2160 IPS	16" 4096×2560 OLED
Refresh Rate	60 Hz	144 Hz	120 Hz	165 Hz	240 Hz
GPU	Intel Iris Xe	NVIDIA RTX 3050	NVIDIA RTX 4070	NVIDIA RTX 4080	NVIDIA RTX 4090
Battery	52 Wh	72 Wh	86 Wh	99.9 Wh	99.9 Wh
Battery Life	Up to 14 hrs	Up to 10 hrs	Up to 9 hrs	Up to 7 hrs	Up to 8 hrs
Weight	1.19 kg	1.78 kg	1.95 kg	2.45 kg	2.20 kg
Ports	2× USB-C, 1× USB-A	2× USB-C, 2× USB-A, HDMI 2.1	3× USB-C (TB4), 2× USB-A, SD	3× USB-C (TB4), 3× USB-A, HDMI 2.1, SD	4× USB-C (TB5), 2× USB-A, HDMI 2.1, SD, RJ-45
Fingerprint Reader	Yes	Yes	Yes	Yes	Yes
IR Face Auth	No	Yes	Yes	Yes	Yes
Warranty	1 Year Limited	2 Year Limited	3 Year Limited	3 Year Limited	3 Year Premium
Starting Price	$999	$1,299	$1,899	$2,499	$3,499

© 2025 AlphaTech Solutions Inc. All rights reserved.

(USD)					

2.2 Laptop Troubleshooting Procedures

2.2.1 Device Fails to Power On

Follow these diagnostic steps in order before escalating to Tier 2 support:

6. Verify the AC adapter is a genuine AlphaTech adapter matching the model's wattage (65W for 13 Air; 100W for all others)
7. Inspect the USB-C power port for debris or bent pins using a 5× magnification loupe
8. Perform a hard reset: hold the power button for 15 seconds, then attempt to power on while connected to AC
9. Access the BIOS Battery Reset utility by holding Fn + Shift + B during startup on all ProLine models
10. If none of the above restore power, replace the I/O board (Part No. AT-IOB-XX per model; see Parts Catalogue v3.1)

2.2.2 Display Issues: Flickering or No Output

OLED display variants (ProLine 15 Ultra and X1 Studio) are susceptible to pixel-level abnormalities if subjected to sustained static images at 100% brightness. Technicians should:

- Run the AlphaTech Display Diagnostics Tool v2.4 (available on the internal technician portal) to generate a pixel map report
- Check the display cable connector on the motherboard; re-seat with 0.5 Nm torque using a T4 Torx driver
- Update GPU drivers to the latest certified build from the AlphaTech Driver Repository — never use generic OEM drivers on ProLine X1 Studio

2.3 Tablet Troubleshooting — AlphaPad Series

The AlphaPad Pro 12 and AlphaPad Lite 10 share a common charging architecture but differ in display technology and RAM configuration. The following issues are most frequently reported:

2.3.1 Touch Screen Unresponsive

Confirm the AlphaOS version is 14.2 or later, as earlier firmware had a known capacitive controller bug (Bug ID: AT-22847). Update via Settings > System > Software Update. If the device cannot enter the OS, boot into Recovery Mode (Volume Up + Power, hold 8 seconds) and perform a firmware flash via USB-C using the AlphaTech Recovery Utility.

2.3.2 Charging Port Failure

If the AlphaPad fails to charge via the USB-C port but charges wirelessly at the expected 15W rate, the USB-C controller IC has likely failed. This component (Part No. AT-USBC-PAD12) requires microsoldering and should only be replaced by AlphaTech Certified Repair Centres (ACRCs). Attempting replacement at non-ACRC facilities voids the manufacturer warranty.

© 2025 AlphaTech Solutions Inc. All rights reserved.

2.4 IoT Device Troubleshooting — AlphaConnect Platform

AlphaTech's AlphaConnect ecosystem includes smart sensors, environmental monitors, and edge compute nodes deployed across enterprise campuses. All AlphaConnect devices communicate via the AT-Mesh protocol, a proprietary extension of IEEE 802.15.4.

2.4.1 Device Not Appearing in Dashboard

NOTE	Ensure the AlphaConnect Hub firmware is v3.6.1 or later before onboarding new devices. Hub firmware updates must be applied during scheduled maintenance windows to avoid disruption to connected sensor networks.

- Confirm device LED is solid amber (provisioning mode). A rapid blue flash indicates the device is in factory reset and must be re-provisioned
- Verify the AT-Mesh network has line-of-sight coverage or adequate mesh relay density (minimum 1 relay node per 15 metres in dense environments)
- Use the AlphaConnect Diagnostics CLI: alphactl device scan --verbose to enumerate all devices on the mesh segment

2.4.2 Sensor Data Drift or Anomalous Readings

AlphaSensor environmental monitoring units require annual calibration against NIST-traceable reference instruments. Units out of calibration cycle will display a yellow exclamation badge in the AlphaConnect Dashboard. Contact AlphaTech Professional Services (PS) to schedule a Calibration Service Event (CSE). Attempting self-calibration using third-party tools will invalidate the unit's certification for regulated environments (ISO 14644 cleanrooms, hospital wards, data centres).

© 2025 AlphaTech Solutions Inc. All rights reserved.

Chapter 3: Software & Cloud Services

AlphaTech's software ecosystem is built on a hybrid cloud-native architecture branded AlphaCloud. This chapter covers authentication troubleshooting, full API documentation for the AlphaCloud REST API v3, and storage tier specifications.

3.1 SaaS Login Issues

The AlphaTech Identity Platform (AlphaID) provides Single Sign-On (SSO) across all SaaS products. AlphaID supports SAML 2.0, OAuth 2.0, and OpenID Connect (OIDC) protocols. The following error codes are most frequently encountered:

Error Code	Description	Resolution
AID-401	Authentication token expired or invalid	Re-authenticate; check system clock sync (NTP)
AID-403	Insufficient permissions for requested resource	Contact AlphaID admin to review role assignments
AID-429	Rate limit exceeded (50 auth attempts / 5 min)	Wait 5 minutes; enforce MFA to reduce brute-force
AID-503	AlphaID service temporarily unavailable	Check status.alphatechsolutions.com; await recovery
AID-MFA-001	TOTP code rejected (clock skew > 30 seconds)	Synchronize device clock to UTC via NTP server
AID-SSO-109	SAML assertion signature verification failed	Re-upload IdP metadata; verify certificate expiry

3.1.1 Account Lockout Procedure

Accounts are locked after five (5) consecutive failed authentication attempts within a 10-minute window. Tier 1 Support agents may unlock accounts using the AlphaID Admin Console with appropriate role permissions. Unlocking a locked account triggers an automatic security notification to the account owner's registered recovery email. If the recovery email is also compromised, the account must be escalated to the Identity Security Team for manual verification.

3.2 API Documentation — AlphaCloud REST API v3

The AlphaCloud REST API v3 provides programmatic access to all AlphaTech cloud resources. All API requests must be authenticated using Bearer tokens obtained via the AlphaID OAuth 2.0 flow. The base URL for all v3 API endpoints is:

```
https://api.alphacloud.io/v3
```

3.2.1 Core Endpoints Reference

© 2025 AlphaTech Solutions Inc. All rights reserved.

Endpoint	Method	Auth Required	Description
/auth/token	POST	No	Obtain OAuth 2.0 Bearer token using client credentials or authorization code flow
/storage/objects	GET / POST	Yes (Bearer)	List or upload objects to the caller's default storage bucket
/storage/objects/{id}	GET / DELETE	Yes (Bearer)	Retrieve or delete a specific storage object by UUID
/compute/instances	GET / POST	Yes (Bearer)	List or provision virtual compute instances within the caller's project
/compute/instances/{id}/action	POST	Yes (Bearer)	Execute lifecycle actions: start, stop, reboot, snapshot
/networking/vpcs	GET / POST	Yes (Bearer)	Manage Virtual Private Clouds (VPCs) within the caller's organization
/billing/usage	GET	Yes (Bearer + Admin)	Retrieve current billing cycle resource consumption metrics
/iam/users	GET / POST / PATCH	Yes (Bearer + Admin)	Manage Identity and Access Management users and role bindings

3.2.2 Rate Limits & Pagination

The AlphaCloud API enforces the following rate limits per authenticated API key. Exceeding any limit returns HTTP 429 with a Retry-After header indicating the number of seconds until the limit resets.

- Standard API keys: 1,000 requests per minute
- Enterprise API keys: 10,000 requests per minute
- All list endpoints support cursor-based pagination via the after query parameter
- Maximum page size is 500 objects; default is 50 if the per_page parameter is omitted

3.2.3 Webhook Events

Developers can register webhook endpoints in the AlphaCloud Developer Console to receive real-time push notifications for platform events. All webhook payloads are signed with an HMAC-SHA256 signature transmitted in the X-AlphaCloud-Signature header. Consumers must verify this signature before processing any payload to prevent spoofing attacks.

3.3 Cloud Storage Limits by Tier

Feature	Free	Starter	Business	Enterprise	Notes
Storage Capacity	15 GB	500 GB	5 TB	Custom	Expandable in 1 TB increments (Business+)
Egress Bandwidth /	5 GB	100 GB	2 TB	Unlimited	Overage charged at

© 2025 AlphaTech Solutions Inc. All rights reserved.

mo.					$0.08/GB (Business)
Object Size Limit	256 MB	2 GB	50 GB	500 GB	Multi-part upload required > 5 GB
Versioning	No	Yes (30 days)	Yes (1 year)	Yes (Custom)	Restore via API or Console
Geo-Redundancy	Single Region	Single Region	Dual Region	Multi-Region	Available in 12 global regions
CDN Acceleration	No	Yes	Yes	Yes + Custom Domain	Sub-50ms P95 latency globally

© 2025 AlphaTech Solutions Inc. All rights reserved.

Chapter 4: Logistics & Global Trade

AlphaTech Solutions operates a global supply chain spanning 14 countries and 23 warehouse facilities. This chapter documents import duty frameworks, warehouse infrastructure, and return shipping procedures for key markets.

4.1 Import Duty Frameworks

4.1.1 India

Products imported into India under the HS Code classifications applicable to AlphaTech goods (primarily HS 8471 for laptops and tablets, HS 8543 for IoT devices) are subject to the following levies as of FY 2025–26. AlphaTech's Customs Compliance Team maintains up-to-date binding rulings from the Central Board of Indirect Taxes and Customs (CBIC).

Product Category	Basic Customs Duty	IGST	Notes
Laptops & Notebooks (HS 8471.30)	0%	18%	Exempt from BCD under ITA; IGST applies on CIF value
Tablets (HS 8471.30)	0%	12%	Reclassified under GST Notification 11/2023
IoT Sensors (HS 8543.70)	7.5%	18%	Countervailing Duty (CVD) may apply for certain origins
Accessories & Peripherals	10%	18%	Subject to BIS certification (CRS Phase II) before clearance
Spare Parts (listed)	15%	18%	EPCG license reduces BCD to 0% for export-linked imports

COMPLIANCE	All AlphaTech shipments to India must include a valid Bill of Entry, Commercial Invoice, Packing List, Certificate of Origin, and BIS/WPC certificates where applicable. Non-compliant shipments will be detained by Customs and may incur demurrage charges.

4.1.2 European Union (Single Market)

Imports into the European Union are subject to EU Common External Tariff (CET) rates. As an ITA (Information Technology Agreement) signatory, the EU maintains 0% MFN tariff on qualifying ICT goods including laptops and tablets. However, VAT is levied by each member state at the point of entry or sale. The following table reflects standard EU import parameters:

Product	EU CET	VAT Range	Key Regulation
Laptops & Tablets	0%	17–25%	EU Directive 2011/65/EU (RoHS); WEEE

© 2025 AlphaTech Solutions Inc. All rights reserved.

			Directive 2012/19/EU
IoT Devices	0–3.7%	17–25%	EU Cyber Resilience Act (CRA) 2024; Radio Equipment Directive (RED)
Batteries (standalone)	1.9%	17–25%	EU Battery Regulation (EU) 2023/1542
Accessories	3.7%	17–25%	CE Marking required; EN 55032 EMC compliance

All AlphaTech products sold in the EU bear the CE marking and comply with the EU's General Product Safety Regulation (GPSR) effective December 13, 2024. AlphaTech's EU Responsible Person is registered in Germany: AlphaTech GmbH, Schillerstrasse 12, 10625 Berlin.

4.2 Global Warehouse Locations

AlphaTech operates strategically located fulfilment and regional distribution centres to ensure 99.2% SLA for next-business-day delivery across core markets.

Location	Address	Type	Sq Footage	Coverage Region
San Jose, CA	1 AlphaTech Way, San Jose, CA 95110	HQ Fulfilment	420,000 sq ft	Western USA, Canada
Columbus, OH	4400 Morse Crossing, Columbus, OH 43219	Regional DC	280,000 sq ft	Central & Eastern USA
Rotterdam, NL	Waalhaven Z.Z. 21, 3088 HH Rotterdam	EU Gateway	350,000 sq ft	EU, UK, MEA
Frankfurt, DE	Cargo City South, Gate 21, 60549 Frankfurt	Air Freight Hub	120,000 sq ft	DACH, Eastern Europe
Mumbai, IN	JNPT SEZ, Unit 7, Nhava Sheva, MH 400707	South Asia DC	180,000 sq ft	India, SAARC Region
Singapore	51 Alps Avenue, Singapore 498775	APAC Hub	240,000 sq ft	ASEAN, ANZ, Japan
Dubai, UAE	Jebel Ali Free Zone, Zone A, Plot 14	MEA DC	150,000 sq ft	GCC, Africa

4.3 Return Shipping Labels & RMA Process

All returns require a valid Return Merchandise Authorization (RMA) number. The RMA number must be clearly printed on the outer packaging. Packages received without a valid RMA will be refused at the receiving dock and returned at the sender's expense.

4.3.1 Generating a Return Shipping Label

11. Log into the AlphaTech Customer Portal at portal.alphatechsolutions.com using your registered account credentials

© 2025 AlphaTech Solutions Inc. All rights reserved.

12. Navigate to Order History and locate the relevant order. Click Return / Repair Request
13. Select the items to return, specify the reason code from the dropdown menu, and describe the fault in the text field (minimum 50 characters)
14. The system will generate an RMA number and a pre-paid return shipping label (PDF) for your region's contracted carrier (UPS in North America; DHL in Europe and Asia-Pacific)
15. Print and affix the label to the outside of the box. Remove or obscure any previous shipping labels
16. Drop off the package at any authorized carrier location. Track the return via the tracking number embedded in the label

4.3.2 Return Shipping Label Validity

Return shipping labels are valid for twenty-one (21) calendar days from the date of issue. Expired labels will be rejected by the carrier. To generate a replacement label, contact AlphaTech Support with the original RMA number.

© 2025 AlphaTech Solutions Inc. All rights reserved.

Chapter 5: Security Protocols

Security is foundational to AlphaTech Solutions' operational philosophy. This chapter defines mandatory security controls, encryption standards, and escalation rules governing all AlphaTech systems, personnel, and customer data. Compliance with these protocols is obligatory for all employees, contractors, and third-party vendors with system access.

5.1 Multi-Factor Authentication (MFA)

AlphaTech mandates MFA for all internal system access and enforces MFA availability for all customer-facing platforms. The following MFA methods are supported, ranked by security tier:

Tier	Method	Strength	Use Case
Tier 1 (Highest)	FIDO2 Hardware Security Key (YubiKey 5 / AT SecureKey)	Phishing-Resistant	Privileged access accounts, infrastructure admins, C-suite
Tier 2	Passkey (Device-bound, biometric)	Very High	Developer accounts, cloud console access, VPN authentication
Tier 3	TOTP Authenticator App (e.g., Google Authenticator, Authy)	High	Standard employee accounts, SaaS applications
Tier 4	Push Notification (AlphaTech Authenticator App)	Medium-High	Customer-facing AlphaID accounts (consumer portal)
Tier 5 (Lowest)	SMS OTP (Legacy — deprecation scheduled Q3 2026)	Medium	Grandfathered customer accounts; new accounts must use Tier 3+

SMS OTP is being phased out due to SIM-swap attack vulnerabilities. Customers still using SMS OTP will receive automated migration prompts beginning March 1, 2026, with mandatory upgrade enforced by September 30, 2026. Accounts not migrated by this date will have SMS OTP automatically disabled and will be required to set up an authenticator app before next login.

5.2 Data Encryption Standards

AlphaTech applies defence-in-depth encryption across all data states. The following standards are mandatory across all AlphaTech systems and must be verified during third-party security audits (SOC 2 Type II, ISO 27001, CSA STAR Level 2).

5.2.1 Encryption at Rest

- All customer data stored in AlphaCloud is encrypted using AES-256-GCM
- Database encryption employs Transparent Data Encryption (TDE) on all PostgreSQL and MySQL instances

© 2025 AlphaTech Solutions Inc. All rights reserved.

- Encryption keys are managed by AlphaTech Key Management Service (AlphaKMS), which is backed by FIPS 140-2 Level 3 validated Hardware Security Modules (HSMs)
- Customer-managed encryption keys (CMEK) are available for Enterprise tier customers; CMEK allows customers to revoke key access, rendering their data inaccessible to AlphaTech
- Backup archives are encrypted with a separate backup key hierarchy; backup keys are rotated annually

5.2.2 Encryption in Transit

- All external API and web traffic is encrypted using TLS 1.3 minimum; TLS 1.0 and 1.1 are disabled
- Internal service-to-service communication uses mutual TLS (mTLS) with certificates issued by AlphaTech Internal CA (ATCA)
- VPN tunnels for remote employee access use WireGuard with 256-bit ChaCha20-Poly1305 encryption
- Certificate rotation occurs automatically every 90 days via the AlphaTech Certificate Lifecycle Manager (CLM)

5.2.3 Key Rotation Schedule

Key Type	Algorithm	Rotation Period	Managed By
Data Encryption Key (DEK)	AES-256-GCM	90 days	AlphaKMS (automated)
Key Encryption Key (KEK)	RSA-4096	Annual	AlphaKMS HSM
TLS Server Certificates	ECDSA P-384	90 days	AlphaTech CLM
mTLS Client Certificates	ECDSA P-256	90 days	AlphaTech CLM
SSH Host Keys	Ed25519	Annual	Infrastructure team (manual)
Code Signing Certificate	RSA-4096 / SHA-256	Biennial	AlphaTech PKI Team

5.3 Human-in-the-Loop (HITL) Escalation Rules

AlphaTech's Security Operations Centre (SOC) operates 24/7/365 across three shifts covering the Americas, EMEA, and APAC time zones. The HITL framework defines conditions under which automated systems must defer to human security analysts before executing actions that could impact customer data, system availability, or regulatory compliance.

5.3.1 Mandatory HITL Escalation Triggers

CRITICAL	HITL escalation triggers are non-negotiable. Any automated system or AI-assisted tool encountering the following conditions MUST pause and alert an on-call SOC analyst before proceeding. Autonomous action beyond these thresholds requires explicit written

© 2025 AlphaTech Solutions Inc. All rights reserved.

authorization.

Trigger Condition	Severity	Required Human Action
Potential data exfiltration event (> 1 GB unusual egress)	P0 — Critical	SOC Lead + CISO approval required before any network isolation
Ransomware indicators detected on any production server	P0 — Critical	Immediate escalation to Incident Commander; IR playbook ATK-RNS-001 activated
Privileged account login from unrecognized geolocation	P1 — High	SOC analyst must verify with account owner within 15 minutes
Automated WAF rule blocks > 10,000 requests from single IP	P1 — High	Analyst reviews traffic pattern before extending IP ban > 24 hours
Sensitive data classifier flags > 100 records in outbound email	P2 — Medium	DLP analyst reviews email content before delivery or quarantine
Certificate expiry within 7 days (high-traffic endpoint)	P2 — Medium	Infrastructure team notified; manual override if CLM automation fails

5.3.2 Escalation Communication Protocol

When a HITL trigger is activated, the following communication sequence must occur within the stated timeframes:

17. Automated alert pushed to the on-call SOC analyst via AlphaTech PagerDuty within 60 seconds of detection
18. SOC analyst acknowledges the alert within 5 minutes (P0/P1) or 30 minutes (P2/P3) using the PagerDuty mobile app or SOC console
19. If unacknowledged, alert escalates to SOC Lead; a further 5-minute timeout triggers escalation to the CISO and designated deputy
20. For P0 events, the Incident Commander (IC) declares an active incident in the AlphaTech Incident Management System (IMS) and convenes a virtual War Room within 15 minutes
21. All actions taken during the incident are logged in real-time in the IMS; a post-incident review (PIR) is mandatory within 5 business days for all P0 and P1 events

AlphaTech maintains relationships with external incident response firms including CrowdStrike Falcon Complete and Mandiant for surge capacity during large-scale events. Engagement of external IR firms requires CISO authorization and board notification for any incident projected to exceed 48 hours of containment activity.

Appendix A: Laptop Model Deep-Dive Specifications

This appendix provides granular technical and engineering specifications for all five ProLine laptop models. Data reflects factory-default configurations as shipped. Thermal Design Power (TDP) values may be modified by enterprise deployment policies via the AlphaTech Configuration Manager.

A.1 ProLine 13 Air

Ultra-portable powerhouse for on-the-go professionals.

Specification	Details
Processor	Intel Core i5-1340P (12C/16T, 4.6 GHz boost, 28W cTDP)
GPU	Intel Iris Xe Graphics (96 EU, shared memory)
Memory	16 GB LPDDR5-5200 (soldered, non-upgradeable)
Primary Storage	512 GB PCIe Gen 4 NVMe SSD (Samsung PM9A1)
Secondary Storage	None (no M.2 slot)
Display	13.3" IPS, 2560×1600, 100% sRGB, 400 nits, Gorilla Glass 5
Battery	52 Wh Li-Polymer, up to 14 hours MBO (JEITA 3.0)
Charging	65W USB-C PD; 0–80% in 45 minutes
Connectivity	Wi-Fi 6E (802.11ax), Bluetooth 5.3
Dimensions	298 × 211 × 13.4 mm; 1.19 kg
OS (default)	AlphaOS 14.2 (upgradeable to 15.x)
TDP Profile	15W (Eco) / 28W (Performance)
Keyboard	Backlit, 1.2mm key travel, spill-resistant
Webcam	1080p 60fps, dual far-field microphones, no IR
Target Segment	Executives, frequent travellers, education

A.2 ProLine 15 Pro

Versatile performance for business professionals and developers.

Specification	Details
Processor	Intel Core i7-1370P (12C/16T, 5.2 GHz boost, 28W cTDP)
GPU	NVIDIA GeForce RTX 3050 (4 GB GDDR6, Optimus)
Memory	16 GB DDR5-4800 (2× SODIMM, upgradeable to 64 GB)

© 2025 AlphaTech Solutions Inc. All rights reserved.

Primary Storage	1 TB PCIe Gen 4 NVMe SSD
Secondary Storage	1× M.2 2280 slot (empty)
Display	15.6" IPS, 2560×1440, 144 Hz, 100% DCI-P3, 500 nits HDR
Battery	72 Wh, up to 10 hours MBO
Charging	100W USB-C PD; barrel connector (legacy)
Connectivity	Wi-Fi 6E, Bluetooth 5.3, optional 5G LTE (Cat-20)
Dimensions	357 × 233 × 18.9 mm; 1.78 kg
OS (default)	Windows 11 Pro / AlphaOS 14.2 (dual-boot option)
TDP Profile	25W (Balanced) / 45W (Turbo)
Keyboard	Full-size backlit, numpad, 1.5mm key travel
Webcam	1080p, IR camera, Windows Hello certified
Target Segment	SMB, developers, field engineers

A.3 ProLine 15 Ultra

OLED clarity meets professional-grade GPU performance.

Specification	Details
Processor	Intel Core i9-1390H (14C/20T, 5.4 GHz boost, 45W cTDP)
GPU	NVIDIA GeForce RTX 4070 (8 GB GDDR6X, MUX Switch)
Memory	32 GB DDR5-5600 (2× SODIMM, upgradeable to 64 GB)
Primary Storage	1 TB PCIe Gen 5 NVMe SSD
Secondary Storage	1× M.2 2280 PCIe Gen 4 slot
Display	15.6" OLED, 3840×2400, 120 Hz, 100% DCI-P3, 600 nits, VESA HDR True Black 500
Battery	86 Wh, up to 9 hours MBO
Charging	140W USB-C PD (Thunderbolt 4)
Connectivity	Wi-Fi 7 (802.11be), Bluetooth 5.4, Intel Thunderbolt 4
Dimensions	357 × 235 × 19.8 mm; 1.95 kg
OS (default)	Windows 11 Pro
TDP Profile	35W (Battery Saver) / 80W (Max Performance)
Keyboard	RGB per-key backlit, anti-ghosting, 1.8mm key travel
Webcam	4K, IR camera, NPU-accelerated background blur
Target Segment	Creative professionals, content creators, designers

© 2025 AlphaTech Solutions Inc. All rights reserved.

A.4 ProLine 17 Max

Desktop-replacement power for engineering and data workloads.

Specification	Details
Processor	AMD Ryzen 9 7945HX (16C/32T, 5.4 GHz boost, 55W cTDP)
GPU	NVIDIA GeForce RTX 4080 (12 GB GDDR6X, MUX Switch)
Memory	32 GB DDR5-5200 (2× SODIMM, upgradeable to 128 GB)
Primary Storage	2 TB PCIe Gen 5 NVMe SSD (RAID 0 option with 2× 1 TB)
Secondary Storage	1× M.2 2280 + 1× 2.5" SATA bay
Display	17.3" IPS, 3840×2160, 165 Hz, 100% Adobe RGB, 600 nits, Dolby Vision
Battery	99.9 Wh, up to 7 hours MBO
Charging	240W proprietary barrel connector; 140W USB-C supplemental
Connectivity	Wi-Fi 7, Bluetooth 5.4, 2.5GbE RJ-45
Dimensions	398 × 283 × 25.6 mm; 2.45 kg
OS (default)	Windows 11 Pro (Ubuntu LTS available)
TDP Profile	45W (Quiet) / 100W (Unleashed)
Keyboard	Mechanical-feel switches, CNC aluminium frame, numpad
Webcam	4K 60fps, dual IR, integrated NPU
Target Segment	Data scientists, engineers, enterprise workstation replacement

A.5 ProLine X1 Studio

AlphaTech's flagship — engineered for extreme creative and AI workloads.

Specification	Details
Processor	Intel Core Ultra 9 185H (24C, 5.1 GHz boost, 45W cTDP, integrated NPU 48 TOPS)
GPU	NVIDIA GeForce RTX 4090 (16 GB GDDR6X, MUX Switch, DLSS 3.5)
Memory	64 GB DDR5X-7200 (soldered; 128 GB BTO option)
Primary Storage	2 TB PCIe Gen 5 NVMe SSD
Secondary Storage	1× M.2 2280 PCIe Gen 5
Display	16" OLED, 4096×2560, 240 Hz, 100% DCI-P3, Pantone Validated, 1000 nits peak
Battery	99.9 Wh, up to 8 hours MBO (NPU-optimized power mode)

© 2025 AlphaTech Solutions Inc. All rights reserved.

Charging	240W USB-C PD (Thunderbolt 5); dual-port simultaneous charging
Connectivity	Wi-Fi 7 (802.11be 6 GHz), Bluetooth 5.4, Thunderbolt 5 (120 Gbps)
Dimensions	358 × 249 × 18.2 mm; 2.20 kg
OS (default)	Windows 11 Pro (AlphaOS Studio Edition available)
TDP Profile	28W (Creator) / 55W (Studio) / 115W (Extreme)
Keyboard	RGB per-key, haptic touchpad, programmable macro row
Webcam	8K 30fps (for video production), LiDAR depth sensor, IR
Target Segment	VFX artists, 3D animators, AI researchers, game developers

Appendix B: Internal Employee Conduct Policy

AlphaTech Solutions maintains rigorous standards of professional conduct to foster a respectful, inclusive, and high-integrity workplace. All employees — regardless of seniority, location, or employment classification — are bound by the policies in this appendix. Violations may result in disciplinary action up to and including termination and, where applicable, legal proceedings.

B.1 Code of Business Ethics

AlphaTech operates under a zero-tolerance policy for bribery, corruption, and conflicts of interest. Employees must disclose any personal financial interest in a vendor, customer, or competitor to the Legal & Compliance team using the Conflict of Interest Disclosure Form (HR-COID-001) within 30 days of the interest arising or employment commencement, whichever is earlier.

Gifts and entertainment received from or provided to external parties are subject to the AlphaTech Gifts and Entertainment Policy: any gift valued above USD $75 must be declared via the HR portal; any gift valued above USD $250 must be declined or surrendered to the AlphaTech employee welfare fund.

B.2 Workplace Conduct Standards

B.2.1 Respectful Workplace

All employees are expected to treat colleagues, customers, and partners with dignity and respect irrespective of age, gender, ethnicity, national origin, disability, religion, sexual orientation, or any other protected characteristic. Harassment, discrimination, or retaliation of any kind is strictly prohibited and should be reported immediately to HR via the anonymous AlphaTech Ethics Hotline (1-800-555-0188 or ethics@alphatechsolutions.com).

B.2.2 Remote Work & Digital Conduct

Employees working remotely are required to maintain a professional environment during video calls, avoid sharing confidential materials on personal devices, and adhere to all IT security policies including mandatory VPN usage for accessing internal systems. Recording of internal meetings requires the consent of all participants. Sharing internal meeting recordings externally is prohibited without CISO and HR co-authorization.

B.3 Disciplinary Procedures

AlphaTech follows a progressive discipline framework. Minor infractions may result in a verbal counselling session, followed by a written warning, a performance improvement plan (PIP), and finally termination for repeated non-compliance. Gross misconduct — including theft, fraud, intentional data breach, or harassment — may result in immediate termination without prior warning, pending investigation.

© 2025 AlphaTech Solutions Inc. All rights reserved.

Infraction Category	Typical Consequence	Escalation Path
Tardiness / Attendance (isolated)	Verbal counselling	Line manager → HR if repeated > 3 times in 90 days
Policy non-compliance (minor)	Written warning	Line manager + HR Business Partner
Harassment (first occurrence)	Mandatory training + warning	HR Director + Legal; EEOC reporting if applicable
Data policy violation (unintentional)	PIP + mandatory security training	CISO + HR + Line Manager
Fraud / Theft / Gross Misconduct	Immediate suspension pending investigation, likely termination	HR Director + Legal + CEO notification
Intentional data breach	Immediate termination + legal action	CISO + Legal + Law Enforcement referral

Appendix C: Billing Dispute FAQ

This section addresses the most frequently asked questions regarding billing disputes, invoice discrepancies, subscription management, and payment processing issues. The questions are organized by topic for ease of navigation. For disputes not covered here, contact the AlphaTech Billing Support team at billing@alphatechsolutions.com.

C.1 General Billing

Q1: How do I access my invoices and billing history?

Invoices are accessible via the AlphaTech Customer Portal at portal.alphatechsolutions.com under Billing > Invoice History. Invoices are generated on the 1st of each month for subscription services and immediately upon hardware purchase. All invoices are in PDF format and retain a 7-year archive history per our data retention policy. Enterprise customers with a dedicated Account Manager can also request CSV exports of multi-year billing data.

Q2: My invoice amount is different from what I expected. What should I do?

First, review the Invoice Breakdown section which itemizes each charge including base subscription fees, usage overages, applied taxes, and any one-time charges. If a discrepancy persists after review, navigate to Billing > Dispute an Invoice in the portal and complete the dispute form within 60 days of the invoice date. Disputes received after 60 days may not be eligible for adjustment. You will receive a confirmation email with a dispute case number (format: BIL-XXXX-YYYY) within 2 business hours.

Q3: What is AlphaTech's billing cycle?

AlphaTech uses a calendar-month billing cycle for all subscription products. Billing for hardware is processed immediately at the time of order confirmation. Enterprise customers on annual contracts are billed annually in advance unless their MSA specifies quarterly installments. The billing date is locked to the date of initial subscription activation — for example, a subscription activated on March 15th will always renew on the 15th of each subsequent month.

Q4: Why does my invoice show a different tax amount from last month?

Tax rates applicable to your account are determined by the billing address registered on your account and are subject to changes mandated by local tax authorities. AlphaTech's tax engine is updated in real-time via Vertex Tax Compliance software. Notable recent changes include India's reclassification of certain SaaS services under GST and the EU's new Digital Services Tax (DST) rules effective January 1, 2025. If you believe a tax has been applied in error (e.g., you hold a valid tax exemption certificate), upload your certificate under Billing > Tax Exemptions.

Q5: I was charged twice for the same service. How do I get a refund?

Duplicate charges are rare but can occur due to payment gateway timeouts during high-traffic periods. To identify a duplicate: both charges will appear on the same date, for the same amount, with the same description in your banking statement. Submit a dispute via the portal with the two charge reference numbers. AlphaTech will cross-reference with our payment processor (Stripe)

© 2025 AlphaTech Solutions Inc. All rights reserved.

and, upon confirmation, issue a credit note within 5 business days. The refund will be returned to the original payment method within 7–10 business days depending on your bank's processing time.

C.2 Subscription & Plan Disputes

Q6: I downgraded my plan but was still billed at the higher tier. Why?

Plan changes take effect at the start of the next billing cycle unless you select Immediate Downgrade during the change process. If you selected the standard option, the higher-tier rate applies for the remainder of the current cycle and the new rate begins on your next renewal date. If you selected Immediate Downgrade and were still charged the old rate, submit a dispute referencing your downgrade confirmation email (subject line: 'AlphaTech Plan Change Confirmation'). If confirmed, a prorated credit will be applied to your next invoice.

Q7: I cancelled my subscription but was still charged. What are my rights?

Cancellations must be completed by 11:59 PM UTC on the day before the next renewal date to avoid the subsequent billing cycle charge. If you can provide evidence of cancellation (portal confirmation email or cancellation receipt) prior to this deadline, you are entitled to a full refund for the incorrectly charged period. Cancellations submitted after the deadline will take effect at the end of the current paid period — no refund will be issued for an already-processed renewal. If you did not receive a cancellation confirmation, your cancellation may not have been completed successfully; contact support immediately.

Q8: How are overages calculated for cloud storage and compute?

Storage overages are calculated daily based on peak usage within each 24-hour UTC period, then aggregated at month-end. Compute overages (additional vCPU-hours or GPU-hours beyond the plan allocation) are metered in 1-minute intervals and totaled at month-end. Overage rates are: Storage — $0.08 per GB (Business), $0.06 per GB (Enterprise); Compute — $0.04 per vCPU-hour, $0.85 per GPU-hour (A100 equivalent). You can configure budget alerts and hard spend caps in Settings > Billing Alerts to prevent unexpected overage charges.

Q9: My business has multiple seats under a Group Plan. How does billing work when I add or remove seats mid-cycle?

Seat additions are prorated from the date of addition to the end of the current billing cycle. For example, adding a seat on the 15th of a 30-day month results in a charge of approximately half the monthly per-seat rate on your next invoice. Seat removals take effect immediately but no refund or credit is issued for the remaining days in the current billing cycle. We recommend timing seat removals to coincide with your renewal date to maximize the value of each seat.

Q10: I was offered a promotional discount but it wasn't applied to my invoice.

Promotional codes must be entered at checkout or in the Billing > Apply Promo Code section before the invoice is finalized. Codes cannot be retroactively applied to invoices already generated. If you can provide the promotional code and evidence it was valid at the time of purchase (e.g., an email from AlphaTech Marketing), submit a billing dispute with the subject 'Promo Code Not Applied.' Our team will verify eligibility and, if confirmed, issue a one-time credit note equal to the discount value.

C.3 Payment & Refund Disputes

Q11: My payment failed but I can see the charge on my bank statement. Am I being billed?

When a payment attempt fails, AlphaTech's payment processor (Stripe) may place an authorization hold on your card that can appear as a pending charge on your bank statement. This hold is released within 3–7 business days depending on your bank and does not represent a completed charge. You will receive an email notification for every failed payment attempt. If the hold has not cleared after 10 business days, contact your bank with the authorization hold ID (available from AlphaTech Support) to request manual release.

Q12: I requested a refund 15 days ago and it hasn't appeared yet. What's happening?

Refund processing timelines vary by payment method: credit/debit cards typically reflect refunds within 7–10 business days; ACH bank transfers (US) take 5–7 business days; wire transfers (international) take 10–15 business days; AlphaTech wallet credits are applied within 24 hours. If the stated timeline has passed, provide your refund case number (format: REF-XXXX-YYYY) to Billing Support for a trace request with Stripe. Weekend and public holiday processing delays may extend timelines by 2–3 additional business days.

Q13: Can I pay my invoice using multiple payment methods?

Split-payment across multiple methods is supported for enterprise invoices above USD $10,000 via a Manual Payment Request. Contact your Account Manager or billing@alphatechsolutions.com to initiate this process. For standard consumer accounts, only a single primary payment method is supported per transaction. AlphaTech accepts Visa, Mastercard, American Express, ACH bank transfer (US accounts), SEPA Direct Debit (EU accounts), NEFT/RTGS (India), and wire transfer for invoices above USD $5,000.

Q14: What happens to my service if I have an outstanding invoice?

AlphaTech operates a three-stage payment escalation process: (1) On the invoice due date (NET-15 for monthly; NET-30 for enterprise), an automated reminder is sent. (2) If unpaid after 7 days post-due, a service degradation notice is sent and API rate limits are reduced to 10% of normal capacity. (3) If unpaid after 14 days post-due, services are suspended (data remains intact and retrievable for 30 days post-suspension). (4) If unpaid after 45 days, the account enters collections and data may be purged following a 30-day deletion notice. Service restoration is immediate upon full payment of outstanding balances plus a 1.5% per month late payment fee.

Q15: I believe I have been overcharged due to a pricing error on the AlphaTech website. What is the resolution process?

AlphaTech investigates all claims of website pricing discrepancies. If a customer can demonstrate via timestamped screenshot or browser cache evidence that a lower price was displayed at the time of purchase, AlphaTech will honour the displayed price provided the claim is filed within 30 days of purchase. Website pricing errors attributable to AlphaTech (not third-party affiliate sites) will be corrected and affected customers proactively notified and credited. Claims are reviewed by the Pricing Compliance team within 5 business days.

C.4 Enterprise & Complex Disputes

© 2025 AlphaTech Solutions Inc. All rights reserved.

Q16: Our finance team has disputed an invoice but the dispute has been open for 60 days with no resolution. What escalation path exists?

Billing disputes are targeted for resolution within 15 business days. If your dispute has exceeded this threshold, it is eligible for Senior Escalation. Contact your dedicated Account Manager or, if unassigned, email billing-escalations@alphatechsolutions.com with the subject 'Dispute Escalation: [Case Number].' A Senior Billing Analyst will be assigned within 1 business day, and a mandatory resolution timeline of 10 additional business days will be enforced. If the escalation remains unresolved, the dispute is reviewed by the VP of Revenue Operations. AlphaTech's dispute resolution performance is included in quarterly business reviews for Enterprise customers.

Q17: We have multiple subsidiaries billed under different accounts but want consolidated invoicing. Is this possible?

Consolidated billing is available for Enterprise customers with three or more accounts via the AlphaTech Multi-Account Management (MAM) programme. Under MAM, a single master account receives one consolidated monthly invoice covering all subsidiary accounts. Individual subsidiary invoices remain available for internal cost allocation. To enroll, complete the MAM enrollment form available from your Account Manager. Note that all subsidiary accounts must be in good standing (no overdue invoices) to qualify for consolidated billing. Currency unification (to USD or EUR) is required for cross-currency consolidation.

Q18: We are disputing a significant invoice amount (above USD $50,000). What legal and contractual remedies are available?

For disputes involving amounts above USD $50,000, AlphaTech's standard dispute resolution process escalates to formal Alternative Dispute Resolution (ADR). The disputing party must provide a written Notice of Dispute to legal@alphatechsolutions.com and the applicable AlphaTech regional legal entity. Both parties will attempt good-faith negotiation for 30 days. If unresolved, the dispute proceeds to non-binding mediation under the JAMS Comprehensive Arbitration Rules. If mediation fails, binding arbitration in Santa Clara County, California applies per the governing Terms of Service. AlphaTech does not suspend services for disputed amounts above $50,000 during the ADR process, provided the undisputed portion of the invoice is paid on time.

Q19: Our company recently changed legal entity name. How do we update invoices already issued?

Historical invoices cannot be reissued under a new legal entity name once generated, as this would alter financial records that may have been filed for tax purposes. However, AlphaTech can provide an official Letter of Amendment on company letterhead confirming the entity name change for your accounting and audit purposes. For invoices going forward, update the Billing Legal Name in Portal > Account Settings > Company Details. Changes take effect on the next invoice generation cycle. Supporting documentation (Articles of Amendment, Certificate of Name Change) must be uploaded for verification before the name change is reflected.

Q20: We believe AlphaTech has not correctly applied our contracted volume discount. How do we verify and correct this?

Volume discounts negotiated in an MSA are automatically configured in AlphaTech's billing system by the Enterprise Sales Operations team upon contract execution. To verify discount application, navigate to Billing > Contract Summary in the portal, which displays your contracted discount tiers and the thresholds triggering each. If the displayed contract terms differ from your signed MSA,

© 2025 AlphaTech Solutions Inc. All rights reserved.

provide the relevant MSA section reference to your Account Manager. A billing correction spanning up to 12 months of prior invoices may be issued if a systematic error is confirmed. Annual contract reviews include a mandatory discount reconciliation to catch such discrepancies proactively.
